Upgrade to custom image acrylic cover for additional fee

Desktop Fine Art Products

Acrylic Blocks:

Beautiful 1" thick solid acrylic freestanding block with your image fine art printed onto the piece. Perfect for gifts. Display on desks, shelves, window sill or wherever you choose to have a lovely smaller reminder of your furry or feathered family member. Square or rectangular options.

Desktop Fine Art Products

Curved Metal:

Another gorgeous freestanding smaller fine art option. Just like our stunning wall art options, our desktop offering is a vibrant image printed onto a curved aluminum. Several size options to choose from. Another great gift option for giving or as a personal keepsake.

Wall Art

All wall art is museum quality and archival. Custom created just for you by Christine. Options all come ready to hang.

Choose from aluminum, acrylic, framed canvas or museum styled matted and framed gallery print in various sizes from 12x18" up to 40x60" available. Most clients defer to Christine to frame your artwork in what she thinks best compliments your artwork, however you are welcome to suggest preferences.

Three different Collection options are available for all above mediums. Please see price & products guide for specifics.

Metal:

Metal prints are images archivally printed directly onto a 1/8" thick aluminum sheet. These can be done in five different surface options, with a high gloss finish being the more popular. The colors are vibrant and saturated. These pieces are very clean edged and allow one to focus solely on the art image itself.

Acrylic:

A sleek and modern treatment for your dazzling images. Acrylic Prints are beautiful photo prints face-mounted to plexiglass with polished edges. Offered with a variety of ultra-modern mounting options. Again, like metals, this is a frameless option, so you focus solely on the artwork itself.

Framed Canvas:

Fine Art Canvas Wraps are printed directly onto museum-quality canvas material using high-quality archival inks. Your choice of Glossy or Lustre Laminate is applied to each piece to protect the surface of the print. Currently there are two frame profiles from which to choose (slim or wedge) in a handful of color options.

Matted & Framed Fine Art Print:

This is the quintessential and traditional photograph printed on paper and matted and framed. Choose from a traditional glossy or lustre finished print with white mat(s) and simple black wood frame, printed on watercolor paper with a deckled edge float mounted on a white or complimentary colored mat and simple wood frame.
